

Multi-functional Team Designation

In accordance with the prototype requirements' initial evaluation the following self-organizing multi-functional and empowered team was assembled under the lead of the Product Owner Mark Horwath. For additional details regarding specific team experience, please refer to attached resumes.

Functional Role	Resource Name
Technical Architect	Mark Horwath
Frontend Web Developer	Diana LaFaye
Backend Web Developer	John Oo
Backend Web Developer	Christopher Wildes
DevOps	Martin Weinig

Mark Horwath has extensive experience and proven expertise in assessing technology stacks and recommending unique client solutions by leveraging lean, flexible and user-centric Agile product delivery practices.

Diana LaFaye has worked on multiple projects both as Frontend and Backend Web Developer. Her versatility allows fluency between product functionality and user-centered experience.

John Oo and Christopher Wildes, Backend Web Developers, are very well versed at designing mobile and web applications. Both have proven experience using automated testing frameworks...

Martin Weinig is an expert in modern development and operations (DevOps) techniques such as continuous integration and continuous deployment.

The team brings many years of combined experience securing digital services provided to wide range of governmental clients as well as implementing 508 compliance requirements. Additional details regarding specific team responsibilities as well as project itself can be found in the attached Project Charter document.
